

Custom continuous forms are manufactured to satisfy a customer's specific program needs. Traditionally, continuous forms are specified first by width and then by length. For example, a 9-1/2" x 11" form is one in which the overall width is 9-1/2" and the form length is 11". The length of a continuous form is the measurement that determines the size of the press that will be used to produce the form.

5 Day Business Forms has the production capabilities to meet your business form requirements. Most continuous forms are completed in just 5 workdays.

Product Features

- 1000 minimum quantities
- Up to 8 Parts
- 1 to 5 color printing
- 7 standard ink colors
- PMS matched inks
- 4 Color Process
- Back printing
- Desensitizing ink
- Press/crash numbering
- MICR numbering
- Punching
- Transfer Tape
- Full Vertical / Horizontal perforations
- Skip perforations
- Integrated Labels
